A bill will not be deemed correct and binding upon the customer if the Company has records on the basis of which an objection may be considered, or if the customer has in his or her possession such Company records. 4.2.2 Description of Features

a. Three Way Conference, Consultation, Transfer

The Three Way Calling feature allows a customer to add a third party to an existing two-way call and form a three-way call. The call must have been originated from outside the station group and terminate to a station within the station group.

b. Call Hold

The Call Hold feature allows a customer to put any in-progress call on hold by flashing the switchhook and dialing a code. This frees the line to allow the customer to make an outgoing call to another number. Only one call per line can be on hold at a time. The third party cannot be added to the original call.

c.. Call Forwarding

Call Forwarding, when activated, redirects attempted terminating calls to another customer-specific line. The customer may have to activate and deactivate the forwarding function and specify the desired terminating telephone number during each activation procedure. Call originating ability is not affected by Call Forwarding.

The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the customer with the Call Forwarding is billed for the forwarded leg of the call.

d. Call Waiting/Cancel Call Waiting

Call Waiting provides a tone signal to indicate to a customer already engaged in a telephone call that a second caller is attempting to dial in. It will also permit the customer to place the first call on hold, answer the second call and then alternate between both callers. Cancel Call Waiting (CCW) allows a Call Waiting (CW) customer to disable CW for the duration of an outgoing telephone call. CCW is activated (i.e., CW is disabled) by dialing a special code prior to placing a call, and is automatically deactivated when the customer disconnects from the call.

2. Surcharge

In addition to the charges provided in this tariff and other interstate toll tariffs in which this Company concurs, a surcharge will apply to all residence and business access lines served by this Company. This surcharge applies regardless of whether or not the access line uses the Pennsylvania Telecommunications Relay Service.

This surcharge serves as the funding vehicle for the operation of the Pennsylvania Telecommunications Relay Service, and shall be calculated by the Pennsylvania Public Utility Commission (the Commission). The Commission shall compute the Pennsylvania Telecommunications Relay Service Surcharge each year and notify local exchange carriers of the surcharge amount to be applied for the twelve month period commencing with July 1 of each year.

The Commission may revise the surcharge more frequently than annually at its discretion.

Tariff revisions will be filed whenever the Commission calculates a new surcharge amount and notifies the Company.

The following surcharge rates apply to all bills issued on or after July 1, 2005.

(C)

Per residence access line, per month	\$0.07	(I)
Per business access line, per month	\$0.10	(D)

Centrex-type lines will be charged on an equivalency basis as determined by the Commission.

Section 7 - MISCELLANEOUS (Cont'd)

7.3 Pennsylvania Telecommunications Relay Service (Cont'd)

3. Rates

Local calls will be charged at the applicable local flat rate or local measured service rate, except for calls originating from Pay Telephones, which shall be completed free of charge. All intraLATA toll calls, placed through the Pennsylvania Telecommunications Relay Service will be rated according to the Rates Applicable On Messages Place by Certified Speech and/or Hearing Disabled rates in the Pennsylvania Telephone Association Toll Tariff PA. P.U.C. No. 10. This Company concurs in this tariff.

The Company will make available to the Telecommunications Relay Service (TRS) user either a calling card or a prepaid debit card. The rates for either option will not exceed those that would apply to identical calls for non-TRS users of coin-sent-paid services.

Please refer to the appropriate Interexchange Carrier tariff for interstate charges.

4. Certification

Acceptable certifications are:

- A. Those made by a licensed physician, otolaryngologist, speech-language pathologist or audiologist or an authorized representative of a social agency that conducts programs for persons with hearing or speech impairment in cooperation with an official agency of the Commonwealth of Pennsylvania, or
- B. A pre-existing certification establishing the impairment of hearing or speech such as those which qualify the handicapped person for social security benefits on the basis of total hearing impairment or for the use of facilities of an agency for a person with hearing or speech impairment.

Section 7 - MISCELLANEOUS (Cont'd)

7.3 Pennsylvania Telecommunications Relay Service (Cont'd)

5. Qualification

A customer qualifying for the discount is one whose impairment is such that competent authority would certify him or her as being unable to use a telephone for voice communication.

6. Billing

The reduction in charges is applied only at one location, designated by the impaired person.

7.4 IntraLata Toll Presubscription

The Company will offer this service at such time as it begins to offer local exchange voice services.

7.4.1 IntraLATA Presubscription is a procedure whereby the Customer designates to the Company the IntraLATA Toll Provider (ITP) which the Customer wishes to be the carrier of choice for intraLATA toll calls. Such calls are automatically directed to the designated carrier without the need to use carrier access codes or additional dialing to direct the calls to the designated carrier. IntraLATA presubscription does not prevent a customer, who has presubscribed to an IntraLATA toll carrier, from using carrier access codes or additional dialing to direct calls to an alternative intraLATA toll carrier on a per call basis.

Each carrier will have one or more access codes assigned to it for various types of service. When an end user selects a carrier as its preferred intraLATA toll provider only one access code of that carrier may be incorporated into the switching system of the Company permitting access to that carrier by the end user without dialing an access code.

Section 7 - MISCELLANEOUS (Cont'd)

7.4 IntraLata Toll Presubscription (Cont'd)

7.4.1 (Cont'd)

An ITP must use Feature Group D (FGD) Switched Access Service to qualify as an intraLATA toll provider unless prior arrangements have been made with or by the Company. IntraLATA toll providers must submit an Access Service Request (ASR) prior to the intraLATA toll presubscription conversation date or prior to the date on which the carrier proposes to begin participating intraLATA toll presubscription, unless prior arrangements have been made with the Company.

Selection of an intraLATA toll provider by an end user is subject to the terms and conditions following:

- 7.4.2 At the option of the ITP, the nonrecurring charge for a change in intraLATA toll presubscription, as provided, here in, may be billed to the ITP, instead of the end user. This may involve charges resulting from end-user initial free choice PIC changes, as specified herein.

This option for the ITP to be billed for the PIC change charge instead of the end user is not available for orders placed directly via the Company's Business Offices.

7.4.3 Presubscription Charge Application

- A. Existing end users may exercise an initial free presubscription choice, either by contacting the Company or by contacting the ITP directly. The initial free choice must be made within 90 days following implementation of intraLATA toll presubscription. The charge for the initial free choice change will be billed to the new ITP at the discretion of the Company. End users' choices which constitute exercising the free initial choice are:

Section 7 - MISCELLANEOUS (Cont'd)

7.4 IntraLata Toll Presubscription (Cont'd)

7.4.3 Presubscription Charge Application (Cont'd)

(A. Cont'd)

1. Designating an ITP as their primary carrier thereby requiring no access code to access that ITP's service. Other carriers are accessed by dialing 101XXXX, or other required codes.
2. Choosing no carrier as a primary carrier thus requiring 101XXXX code dialing to access all ITPs. This choice can be made by directly contacting the Company.

Following an existing end user's initial free selection, any subsequent selection made during the first 90 days after presubscription or any change made more than 90 days after presubscription is implemented is subject to a nonrecurring charge as set forth herein.

- B. New end users who subscribe to service after the presubscription implementation date (including an existing customer who orders an additional line) will be asked to select a primary ITP when they place an order to the Company's Exchange Service. If a customer cannot decide upon an intraLATA toll carrier at the time, the Company may extend a 30 day period following completion of the service request to make an intraLATA PIC choice without charge. In the interim, the Customer will be assigned a "No-PIC" and will have to dial an access code to make intraLATA toll calls.

Section 7 - MISCELLANEOUS (Cont'd)

7.4 IntraLata Toll Presubscription (Cont'd)

7.4.3 Presubscription Charge Application (Cont'd)

(B. Cont'd)

Initial free selections available to new end users are:

1. Designate an ITP as their primary carrier thereby requiring no access code to access that ITP's service. Other carriers are accessed by dialing 101XXXX, or other required codes.
2. Choose no carrier as a primary carrier thus requiring 101XXXX code dialing to access all ITPs. This choice can be made by directly contacting the Company. In addition, new end users that do not select a preferred carrier will be assigned a "No-PIC".

Following a new end user's initial free selection, any subsequent selection made following implementation of intraLATA toll presubscription is subject to a nonrecurring charge as set forth herein.

Section 7 - MISCELLANEOUS (Cont'd)

7.4 IntraLata Toll Presubscription (Cont'd)

7.4.3 Presubscription Charge Application (Cont'd)

- C. If an ITP elects to discontinue Feature Group D service after implementation of the intraLATA toll presubscription option, the ITP is obligated to contact, in writing, all end users who have selected the canceling ITP as their preferred intraLATA toll provider. The ITP must inform the end users that it is canceling its Feature Group D service, request that the end user select a new ITP, and state that the canceling ITP will be the PIC change charge as provided herein. The ITP must provide written notification to the Company that this activity has taken place.

Following the ITP's discontinuance of service, the Company will bill the canceling ITP the change charge for each end user that is currently designated to the ITP at the time of discontinuance.

- D. An authorized PIC change is a change in the presubscribed intraLATA toll provider that the end user denies authorizing. PIC disputes for end users are resolved through an investigative process.

If an unauthorized change in intraLATA presubscription occurs, the ITP making the unauthorized change will be assessed a charge for unauthorized change in presubscription as provided herein. In addition, the ITP will be assessed the applicable charge for returning the end user to their preferred intraLATA toll provider.

Section 7 - MISCELLANEOUS (Cont'd)

7.4 IntraLata Toll Presubscription (Cont'd)

7.4.3 Presubscription Charge Application (Cont'd)

(D. Cont'd)

If an unauthorized change in intraLATA toll presubscription and interLATA presubscription occurs at the same time, on the same Business/Residence line, and the presubscribed ITP is the same carrier for intraLATA and interLATA, presubscription change charges as provided herein and the Company's corresponding F.C.C. Access Tariff apply. In addition, the ITP will be assessed the applicable charges for returning the end user to their preferred intraLATA toll provider as herein and in the Company's corresponding F.C.C. Tariff.

7.4.4 Equal Access Recovery Charge

The Equal Access Recovery Charge is a charge to recover the costs that the Company has directly incurred in connection with the implementation of intraLATA toll presubscription. The Equal Access Recovery Charge is billed to intraLATA toll providers.

Section 7 - MISCELLANEOUS (Cont'd)

7.4 IntraLata Toll Presubscription (Cont'd)

7.4.5 End User Charge Discrepancy

- A. When a discrepancy is determined regarding an end user's designation of a preferred intraLATA toll carrier, the following applies depending upon the situation described:
1. A signed letter to authorization takes precedence over any order other than subsequent, direct customer contact with the Company.
 2. When two or more orders are received for an end user line generated by telemarketing, the date field on the mechanized record used to transmit PIC change information will be used as the PIC authorization date. The order with the latest application date/time determines customer choice.
 3. If an end user denies requesting a change in intraLATA toll presubscription as submitted by an ITP, and the ITP is unable to produce a letter to authorization, signed by the end user, the ITP will be assessed all applicable change charges. The nonrecurring change charges are provided herein. The ITP will also be assessed the intraLATA toll presubscription change charge as specified herein, which was previously billed to the end user.

 Section 7 - MISCELLANEOUS (Cont'd)

7.4 IntraLata Toll Presubscription (Cont'd)

7.4.5 End User Charge Discrepancy (Cont'd)

B. Verification of Orders for Telemarketing

Neither the ITP or the Company shall submit a PIC change order generated by outbound telemarketing unless and until the order has first been confirmed in accordance with the F.C.C.'s current anti-slamming practices and procedures.

7.4.6 Rates and Charges

	<u>Rate</u>
A. The charge for a change in IntraLATA Toll Presubscription	\$5.00 per line
B. The charge for an unauthorized Business or Residential service Change in intraLATA Toll Presubscription	\$35.65 per line

7.5 Caller ID Blocking

7.5.1 Caller ID Per-Call Blocking: This feature allows the calling party to block the passage of their telephone number and name on outgoing calls

7.5.2 Caller ID Per-Line Blocking: This will allow the calling party to prevent the display of their telephone number and name on all calls placed from their line on a permanent basis.
